## **NORMAN BUI**

+1 613-983-3217 | normanbui@cmail.carleton.ca | linkedin.com/in/nbui23 | github.com/nbui23 | Toronto, ON

## **EDUCATION**

Carleton University | Bachelor of Computer Science (Honours), 3.9/4.0 (A) GPA

**Expected April 2026** 

• Relevant Coursework: Data Structures & Algorithms, Discrete Math and Structures, OS, OOP, Paradigms, Web Development, QA, HCI (UI/UX), Database Management Systems, Statistical Modeling, Calculus, Linear Algebra

#### **EXPERIENCE**

**Autodesk** | Incoming Software Developer Intern - Java, TypeScript, GraphQL

lan 2025

• Will be working on cloud-based CAD/CAM development for Autodesk's Fusion platform (Winter 2025)

**Public Health Agency of Canada** | Junior Data Scientist - Python, LLM, MDM

Sep 2024 - Present

• Developing LLM-powered Master Data Management system with Imperial College London and WHO, automating epidemiological literature reviews and enabling standardized research access across global health initiatives

**Kongsberg Geospatial** | *Software Engineer Intern - C++, Qt, Python, GIS* 

May 2024 - Aug 2024

- Pioneered establishment of Solutions Engineering team as a founding software engineer, developing demos using TerraLens SDK, resulting in successful solution delivery to various major aviation, defence, and government clients
- Integrated LiDAR, WMTS, and S-57 data and optimized render pipeline to achieve consistent 60+ FPS with real-time object tracking, while implementing system monitoring (GPU, CPU, RAM) and modernizing Qt UI/UX
- Developed automated airspace classification framework for North American and Australian regions, removing manual processing and standardizing data categorization
- Automated VFR and terrain data processing workflows, reducing aggregating time by more than 40%

**Health Canada** | Data Scientist Intern - Python, ML, NLP, ETL

Sep 2023 - Dec 2023

- Developed Python solutions for chemical assessment, leading to improved risk data aggregation and analysis
- Built random forest classifiers with pandas, NumPy, SciPy, and scikit-learn to accurately predict chemical toxicity
- Rebuilt organization-wide federated chemical search system using BeautifulSoup4 and lxml, implementing automated fault tolerance and rate limiting that increased query success rate by **20%**
- Architected scalable API templates and implemented test-driven development practices using unittest framework, restoring chemical data source integration capability **by 113%** and achieving **100% test coverage**
- Engineered automated knowledge graph pipeline using Neo4j, CoreNLP, and Stanza to extract semantic triples from medical literature, reducing qualitative data processing time and work

**Department of National Defence** | Junior AI/ML Engineer - Python, LLM, RAG

Iun 2023 - Nov 2023

- Built conversational AI system using GPT-3.5 and Flask, implementing RAG architecture to enable intelligent querying across **20+ tax documents**
- Developed NLP pipeline using NLTK, integrating tokenization, contextual analysis, and NER to enhance text understanding and information extraction accuracy
- Architected vector search system using FAISS and SQLite3, optimizing embedding storage and retrieval for real-time query responses

**NAV CANADA** | Software Engineer Intern - C++, Qt, PowerShell, GIS

May 2023 - Aug 2023

- Developed C++ solutions for various ATC applications, resulting in improved performance and reliability
- Optimized data management algorithm for internal data tool, resulting in a **60% decrease** in storage utilization and **30% boost** in automated data analysis performance
- Resolved multiple bugs in ATC software, achieving an overall improvement of 16% in frame rate
- Automated network configurations with PowerShell, reducing manual work and setup time by more than 95%

# **PROJECTS**

**Obscure Language RAG Systems** | *Python, RAG, LangChain, FAISS, Sentence Transformers* 

0

Researched and developed RAG systems to answer obscure programming language gueries @ Bedarra Corporation

**SocialSaplings** | HTML/SCSS, JavaScript, Bootstrap, Node.js, Express.js, Firebase (Firestore, Auth)

O

- Led cross-functional team to build a reforestation platform, resulting in 1st place at KuriusHacks out of 15 teams
- Built tree species recommendation algorithm integrating various APIs to analyze user geodata for optimal planting
- Developed an interactive visualization dashboard using the Google Maps API to display real-time reforestation metrics and global environmental impact data

### **SKILLS**

Languages: C/C++, Python, Java, C#, SQL, HTML/CSS, JavaScript, PHP | English, French, Vietnamese Frameworks & Databases: Flask, Express.js, MySQL, SQLite3, PostgreSQL, Firebase, MongoDB, Neo4J, JUnit, Selenium Libraries: pandas, NumPy, matplotlib, scikit-learn, unittest, spaCy, Sentence Transformers, BS4, lxml, HuggingFace Development Tools: Git, Node.js, Ubuntu, Qt Creator, Postman, Agile Methodology, SDLC, OOP, TDD, Cucumber
